

QUESTIONS TO ASK YOUR DOCTOR ABOUT PROSTATE CANCER SCREENING

Black men in Cuyahoga County have a 60% increased risk of being diagnosed with prostate cancer when compared to white men. Catching prostate cancer early helps reduce future complications and can decrease the amount of treatment needed.

We understand that these topics can be difficult to discuss. Use this graphic to guide your conversations with your doctor about prostate cancer screening!

How can I get a prostate cancer screening?

What are the different types of prostate cancer screenings and how are they performed?

Am I at high risk for prostate cancer?

What is a Prostate Specific Antigen test?

What is a Digital Rectal Exam?

What are the risks and benefits of prostate cancer screening for me?
